

You know how a woman can find herself with her kids all grown, maybe off to college and she is feeling like “what’s next for me?” Or, how am I going to pay for all of this?!

Well, what I do is provide a business model that comes with a personal business coach who guides her to finding ways she can earn additional income and feel a part of a fun and positive group of women.

So what that means is, she will have a sense of belonging and something to call her own, in addition to bringing in additional income to help with unforeseen expenses and still have the flexibility to work when she wants.

- 96% of Americans exchange their time for money resulting in a finite amount of income.
- There is a difference between **creating wealth** and collecting a paycheck.
- Did you know only **3.2% of women in US make over \$100K**? And 82% of those women are their own boss in the direct sales industry?

If you identify with the person described here or know someone that fits the description, please call in or have them listen to this 15 minute recording about what it means to be your own boss.
